

Impact Assessment Report: Water Access Projects

Type: Impact Report | **Date:** August 05, 2025 | **Author:** Dawda Wally

This impact assessment report evaluates the outcomes of EASE's water access projects in Upper River Region communities.

Project Overview:

- Three villages provided with improved water access
- Over 500 community members benefiting from clean water
- Installation of new water pumps and infrastructure rehabilitation
- Community training on water management and maintenance

Impact Findings:

- Reduced time spent fetching water (average reduction of 2 hours per day)
- Improved health outcomes due to access to clean water
- Enhanced community capacity for water resource management
- Positive community feedback and satisfaction

The report includes detailed impact metrics, beneficiary feedback, and recommendations for future projects.
